My location: Yerevan, Armenia

## ABOUT ME

Experienced in JavaScript-based chatbot development for 2 years, I'm now focused on transitioning to frontend development.

I have completed a frontend course at open-source community-driven Rolling Scopes School. During these 10 months I have learnt a lot, both in hard and soft skills. See my team's [final project](#).

Committed to crafting scalable, maintainable, and user-friendly code. Seeking a frontend dev role to apply emerging skills and contribute effectively to innovative projects.

## REACT PROJECTS

### [E-Commerce App](#)

A single-page application made with React, Redux, Tailwind, etc. This is a fake bikes shop with products catalog, users

authorization and shopping cart. It was developed in an Agile team of three as a final student project.

[github repo](#)

## VANILLA JS PROJECTS

Here is my student projects on RSS course. I did not used any frameworks or libraries in order to master fundamental skills.

### JS applications

In these works I have:

- generated all DOM elements with JS,
- separated my code into JS modules,
- applied different approaches to object creation: classes and factory functions

#### [Minesweeper](#)

The classic game in a simple design. You can choose one of three field sizes and customize mines amount.

#### [Virtual Keyboard](#)

A keyboard and an output field. You can choose between two languages. Physical keystrokes are treated as the virtual ones.

### Responsive layouts

This layouts were made given by Figma designs. There are Javascript DOM manipulations, CSS animations, semantic HTML.

## [Pets Shelter](#)

This two page web-site contains an endless slider a pagination (on the second [page](#)) and popping up pets info. (please, open with Chrome).

## [Plants Store](#)

This web-page contains an accordion menu, a custom select form and a special card section (check it out!).

Also, both sites have side navigation menus (appearing on narrow screens).

## COMMERCIAL EXPERIENCE WITH JAVASCRIPT

All positions are full-time, the two more recent are remote.

### Voicebot Developer

*Action-MCFR Mediagroup*

*(Feb 2022 – now)*

- Developing and maintaining voicebots on JAICP: dozens of projects launched
